

Practical No.13: Use of colors of links in web page.

AIM: Write a HTML code to link an external page of different web sites like yahoo.com or google.com using URL and link web page to your mail address.

Apply tags to change colors of links.

```
<html>
<head>
<style>
a:link{color:red;}
a:visited{color:pink;}
a:hover{color:blue;}
a:active{color:yellow;}
<title>practical no 13</title>
</style>
</head>
<body>
<h1>external link and email link</h1>
<p>
<a href="https://www.yahoo.com",target="_blank">html image</a>
</p>
<p>
<a href="https://www.google.com",targe="_blank">redlink</a></p>
<p>
<a href="purva8730@gmail.com">bluelink</a>
</p>
</body>
<html>
```

OUTPUT

external link and email link

[html image](#)

[Redlink](#)

[bluelink](#)
